BRIEFING: Environmental and Climate Justice Communities Grant Program

DECEMBER 2022

AGENDA

1. Overview
2. Goals
3. Holistic Approach
4. Upcoming Competitions
5. Overall Timing
6. Key Points
7. Areas for Further Engagement

OVERVIEW

EPA received \$3 billion in the IRA and \$100 million in the FY-22 budget to support environmental justice activities in OEJECR.

- IRA: \$2.8 billion to provide grants for activities benefiting disadvantaged communities. \$200 million for technical assistance.
- FY-22: \$100 million to improve and enhance the agency's ability to infuse equity and environmental justice principles and priorities into all EPA practices, policies, and programs, including \$51 million for grants and technical assistance.

IRA – E&CJ COMMUNITY GRANT PROGRAM STATUTORY LANGUAGE / DEFINITIONS

Subtitle B—Hazardous Materials

SEC. 60201. ENVIRONMENTAL AND CLIMATE JUSTICE BLOCK GRANTS.

The Clean Air Act is amended by inserting after section 137, as added by subtitle A of this title, the following: “SEC. 138. ENVIRONMENTAL AND CLIMATE JUSTICE BLOCK GRANTS.”

(a) APPROPRIATION.—In addition to amounts otherwise available, there is appropriated to the Administrator for fiscal year 2022, out of any money in the Treasury not otherwise appropriated—

“(1) \$2,800,000,000 to remain available until September 30, 2026, to award grants for the activities described in subsection (b); and “(2) \$200,000,000 to remain available until September 30, 2026, to provide technical assistance to eligible entities related to grants awarded under this section.

“(b) GRANTS.— “(1) IN GENERAL.—The Administrator shall use amounts made available under subsection (a)(1) to award grants for periods of up to 3 years to eligible entities to carry out activities described in paragraph (2) that benefit disadvantaged communities, as defined by the Administrator.

“(2) ELIGIBLE ACTIVITIES.—An eligible entity may use a grant awarded under this subsection for—

“(A) community-led air and other pollution monitoring, prevention, and remediation, and investments in low- and zero emission and resilient technologies and related infrastructure and workforce development that help reduce greenhouse gas (as defined in section 211(o)(1)(G) (as in effect on the date of enactment of this section)) emissions and other air pollutants;

“(B) mitigating climate and health risks from urban heat islands, extreme heat, wood heater emissions, and wildfire events;

“(C) climate resiliency and adaptation;

“(D) reducing indoor toxics and indoor air pollution; or

“(E) facilitating engagement of disadvantaged communities in State and Federal public processes, including facilitating such engagement in advisory groups, workshops, and rulemakings.

“(3) ELIGIBLE ENTITIES.—In this subsection, the term ‘eligible entity’ means—

“(A) a partnership between—

“(i) an Indian tribe, a local government, or an institution of higher education; and

“(ii) a community-based nonprofit organization;

“(B) a community-based nonprofit organization; or

“(C) a partnership of community-based nonprofit organizations.

“(c) ADMINISTRATIVE COSTS.—The Administrator shall reserve 7 percent of the amounts made available under subsection (a) for administrative costs to carry out this section.”

IRA – E&CJ COMMUNITY GRANT PROGRAM STATUTORY LANGUAGE / DEFINITIONS

“(2) ELIGIBLE ACTIVITIES.—An eligible entity may use a grant awarded under this subsection for—

“(A) community-led air and other pollution monitoring, prevention, and remediation, and investments in low- and zero emission and resilient technologies and related infrastructure and workforce development that help reduce greenhouse gas (as defined in section 211(o)(1)(G) (as in effect on the date of enactment of this section)) emissions and other air pollutants;

“(B) mitigating climate and health risks from urban heat islands, extreme heat, wood heater emissions, and wildfire events;

“(C) climate resiliency and adaptation;

“(D) reducing indoor toxics and indoor air pollution; or

“(E) facilitating engagement of disadvantaged communities in State and Federal public processes, including facilitating such engagement in advisory groups, workshops, and rulemakings.

“(3) ELIGIBLE ENTITIES.—In this subsection, the term ‘eligible entity’ means—

“(A) a partnership between—

“(i) an Indian tribe, a local government, or an institution of higher education; and

“(ii) a community-based nonprofit organization;

“(B) a community-based nonprofit organization; or

“(C) a partnership of community-based nonprofit organizations.

IRA – E&CJ COMMUNITY GRANT PROGRAM

STATUTORY LANGUAGE / DEFINITIONS

(a) APPROPRIATION.—In addition to amounts otherwise available, there is appropriated to the Administrator for fiscal year 2022, out of any money in the Treasury not otherwise appropriated—

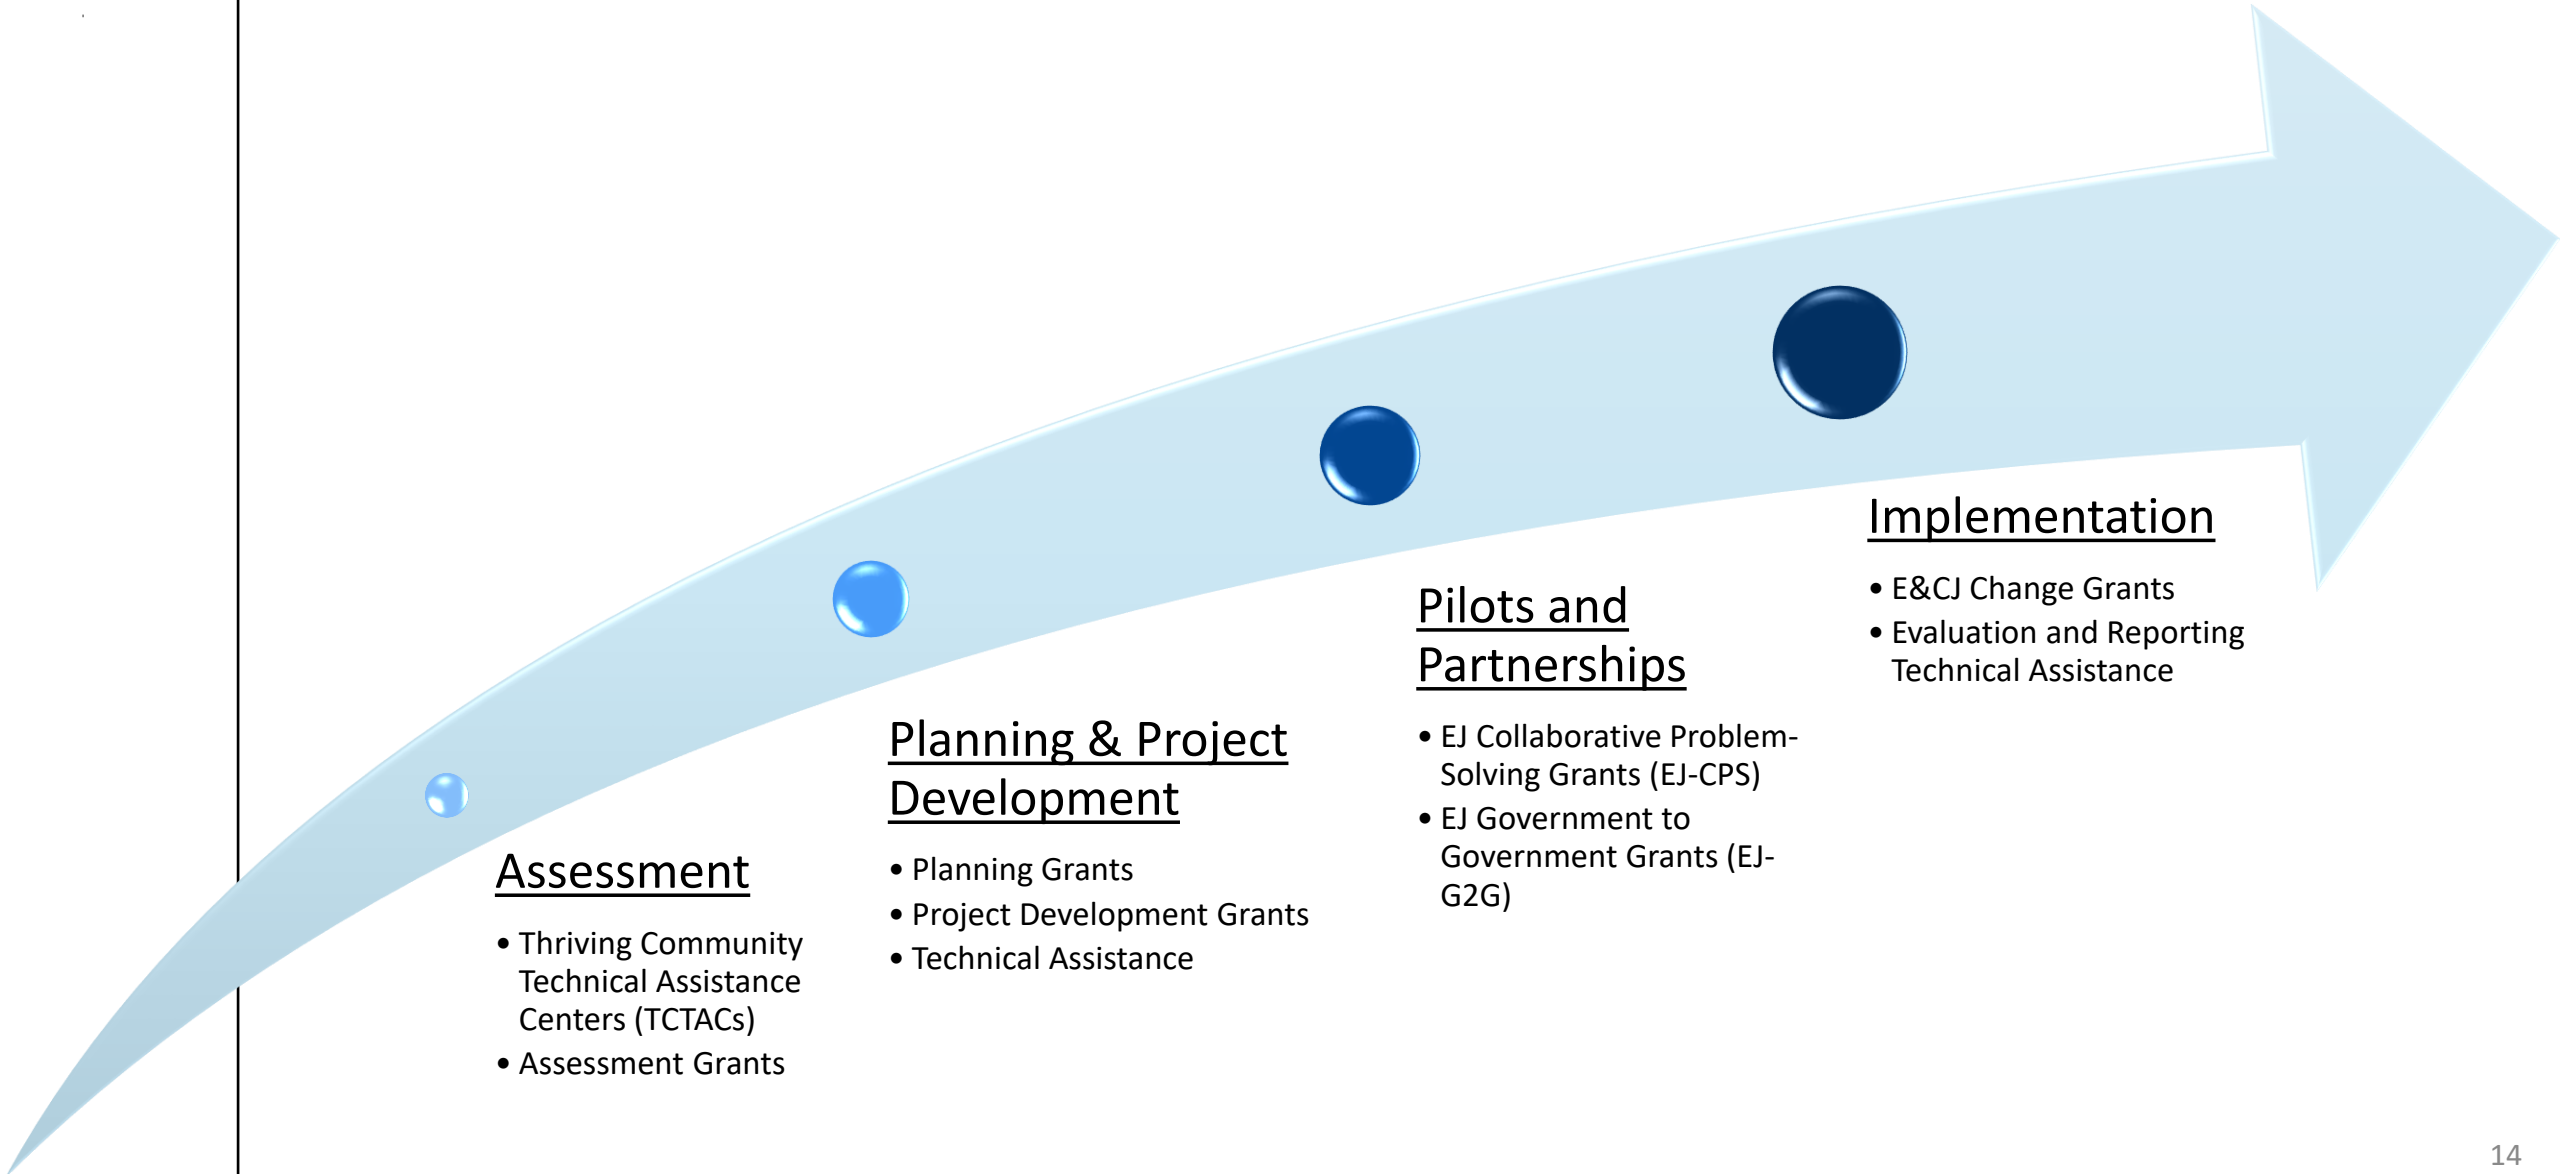

“(1) \$2,800,000,000 to remain available **until September 30, 2026**, to award grants for the activities described in subsection (b); and “(2) \$200,000,000 to remain available **until September 30, 2026**, to provide technical assistance to eligible entities related to grants awarded under this section.

“(b) GRANTS.— “(1) IN GENERAL.—The Administrator shall use amounts made available under subsection (a)(1) to award grants for periods **of up to 3 years** to eligible entities to carry out activities described in paragraph (2) that benefit disadvantaged communities, as defined by the Administrator.

GOALS

- Provide resources as soon as possible on the ground to communities and their partners.
- Meet communities at their needs and where they are in their journey.
- Prove that investing in communities are the best investments to solve the toughest problems in places with the biggest challenges.
- Achieve lasting, meaningful change on the ground.
- Be the bottom-up to all the other top-downs!

ENVIRONMENTAL & CLIMATE JUSTICE COMMUNITIES GRANT PROGRAM

FIRST STEP

Competition
Complete

Thriving Community Technical Assistance Centers (TCTACs)

- Description: GOAL IS TO fund 10 REGIONAL TCTACs (1 per region) AND ONE NATIONAL TCTAC, to provide technical assistance, training, and capacity-building support to communities (and their partners) with environmental justice concerns.
- Timing: RFA launched in August, closed in November. Centers to start operating spring 2023.
- Access: No barrier to entry. Technical assistance provided upon request.
- Grant Funding: Up to \$100 million over five years.

UPCOMING COMPETITIONS

Launch
Competition
ASAP

EJ Collaborative Problem-Solving Grants (EJ-CPS)

- Description: Cooperative agreement grants to CBOs. Expansion of EPA's traditional community grant program with larger awards to pilot implementation activities through community-centered collaborative partnerships
- Timing: Competition opens in December and grants are awarded in summer 2023
- Grant Funding: \$30M IRA funded, up to \$500K each to CBOs, approx. 60 total grant awards. EPA competed / awarded

EJ Government to Government Grants (EJ-G2G)

- Description: Grants to government agencies partnered with CBOs. Expansion of EPA's traditional EJ government grant program with larger awards to gov. agencies partnering with communities to develop plans, projects, and pilot implementation activities
- Timing: Competition opens in December, grants awarded in summer 2023
- Grant Funding: \$40M IRA and \$30M baseline, ~70+ awards up to \$1 million each. EPA competed / awarded. Set-asides used to apportion funding b/w different government agency types

UPCOMING COMPETITIONS

Launch
Competition
ASAP

Assessment, Planning, and Project Development Grants

- Description: Fund 5-10 pass-through funders nationwide to provide grants to community-based nonprofits for assessment, planning, and project development.
- Timing: RFA launch in January, pass-through entities selected in late summer 2023.
- Access: Low barrier to entry. Ability to provide thousands of grants nationwide in next 3 years w/simplified app. process
- Grant Funding:
 - Assessment Grants: \$150M IRA, \$10M FY22 base appropriations
 - Planning grants: \$150M IRA, \$10M FY22 base appropriations
 - Project development grants: \$150M IRA, \$10M FY22 base appropriations

UPCOMING COMPETITIONS

Launch
Competition
in Spring or
Summer 2023

Environmental and Climate Justice Implementation Grants

- Description: Directly funded through EPA
- Timing: Grant competition window opens in late spring/early summer 2023. One-year open window for proposals scored on a monthly basis
- Barrier to entry: Streamlined process being considered – simplified applications, rolling application period, and oral presentations.
- Grant Funding: Up to \$2B IRA funded

KEY PROGRAM MILESTONES (2023-2025)

Launch RFA/RFP

Award Grant/Contract

Program Design

Competition & Review

Funds Awarded

Program	Funds	FY 2023				FY 2024				FY 2025
		Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q4
TCTACs	\$100M									
Planning TA	\$40M									
Assessment Grants	\$160M	<div></div> Pass-through funders apply to EPA for funding		<div></div> EPA selects 5-10 pass-through funders who each then award assessment, planning, and project development grants to subgrantees in discrete regions of the country						
Planning Grants	\$160M									
Project Develop. Grants	\$160M									
Project Develop. TA	\$35M									
EJ-CPS	\$30M									
EJ-G2G	\$70M									
E&CJ Change Grants Round 1	Up to \$2,000M				Grants awarded on a rolling basis through Q3					
E&CJ Change Grants Round 2	TBD									
Eval. & Reporting TA	\$10M									

KEY POINTS

- Building on decades of experience and feedback received on our grant programs especially for the three upcoming competitions launched in December and January.
- Coupling TA with direct financial (grant) assistance. Also investigating ways of providing people power to communities.
- Balancing between getting resources on the street expeditiously but doing so thoughtfully, deliberately, and with engagement and feedback.
- Will have multiple engagement pathways including an RFI.
- Offering resources to communities ready now for implementation and runway for communities that need to build capacity.

AREAS FOR FURTHER ENGAGEMENT

- How to define “partnerships” and community-based organization?
- What size grants are realistic given three-year time limit?
- Thoughts on creative alternatives to lower the barrier to entry – open competitions, simplified applications, oral presentations?
- In addition to the TCTACs and other TA for assessing, planning, and project development, how else can EPA support communities in developing strong partnerships and projects?

OECA's National Compliance Initiatives: Update on Upcoming Cycle - FY2024-2027

NATIONAL EJ COMMUNITY ENGAGEMENT CALL
December 13, 2022

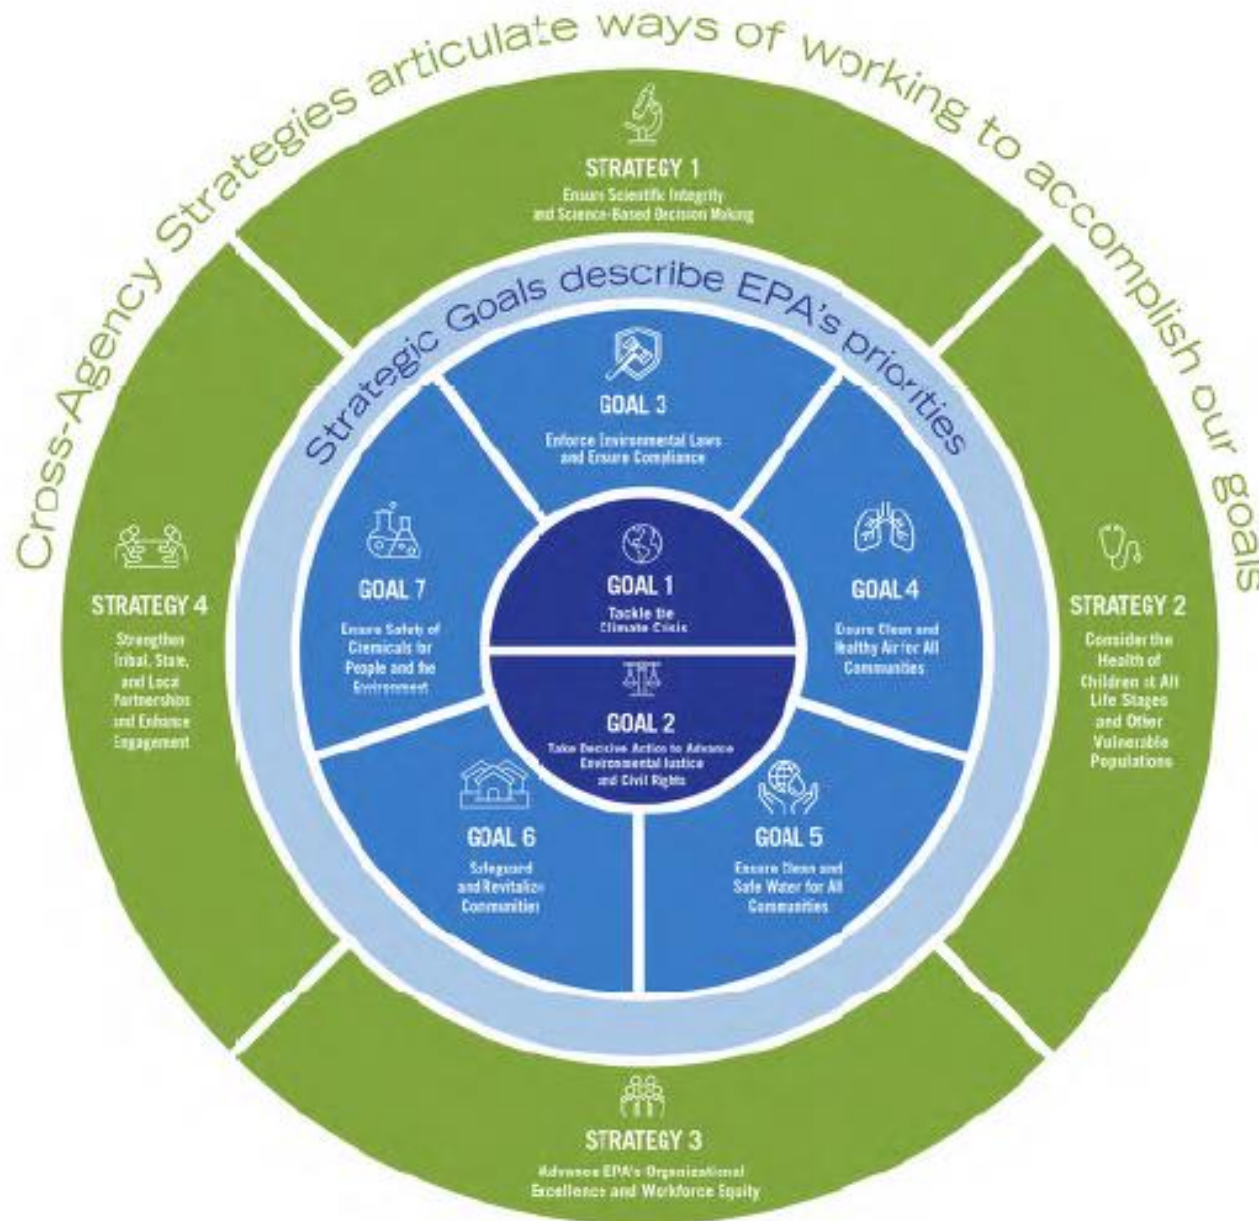

Rosemarie Kelley, Director, Office of Civil Enforcement, OECA

Jacqueline Werner, Deputy Director, Office of Compliance, OECA

Goal 1 : Tackle the Climate Crisis

Goal 2: Take Decisive Action to Advance Environmental Justice

Environmental Justice and Climate are components of all national enforcement and compliance initiatives

NATIONAL INITIATIVES

- Focuses enforcement and compliance assurance resources on the most serious environmental violations
- For FY 2020 - FY 2023 cycle, 6 initiatives

Creating Cleaner Air for Communities by Reducing Excess Emissions of Harmful Pollutants

Stopping Aftermarket Defeat Devices for Vehicles and Engines

Reducing Hazardous Air Emissions from Hazardous Waste Facilities

Reducing Risks of Accidental Releases at Industrial and Chemical Facilities

Reducing Significant Non-Compliance in the National Pollutant Discharge Elimination System (NPDES) Program

Reducing Non-Compliance with Drinking Water Standards at Community Water Systems

Creating Cleaner Air for Communities

- Improve air quality by reducing excess emissions of VOCs and HAPs
- Address significant violations and achieve measurable pollutant reductions

Stopping Aftermarket Defeat Devices for Vehicles and Engines

Focuses on stopping the manufacture, sale, and installation of defeat devices on vehicles and engines used on public roads as well as on nonroad vehicles and engines.

EPA Estimated Emissions Increase Due to Full Delete

Oxides of nitrogen (NO_x) increased ~310x
Non-methane hydrocarbons (NMHC) increased ~1,140x
Carbon monoxide (CO) increased ~120x
Particulate matter (PM) increased ~40x

These test results show increases in NO_x, NMHC, CO, and PM when a tuner enables the full removal of emissions controls (i.e., "a full delete") from a diesel pickup truck. These tests were conducted without the selective catalytic reduction (SCR), diesel particulate filter (DPF), diesel oxidation catalyst (DOC), and exhaust gas recirculation (EGR) emission controls.

Reducing Air Emissions from Hazardous Waste Facilities

Improve compliance with regulations that require the control of organic air emissions from hazardous waste management units

Reducing Risk of Accidents from Chemical Facilities

Reduce risk by having regulated facilities work to:

- Improve safety
- Increase compliance with RMP/GDC requirements
- Promote coordination with responders and communities

MGPI facility - Atchinson, Kansas

Reducing SNC in the NPDES Program

- Reduce by half the number of permittees in SNC by the end of FY2022
- Ensure that the worst SNC violators are timely and appropriately addressed

Reducing Non-Compliance with Drinking Water Standards at CWS

- Improve compliance at CWSs
- Develop sustainable enforcement programs in every EPA Region

Figure 1. Number of Community Water Systems (CWS) with a Health-Based Violation of the National Primary Drinking Water Regulations

- New:** CWS with health-based violations that were not in violation in the third quarter of FY 2017
- Intermittent:** CWS that were on the baseline list of CWS with health-based violations (2017Q3) and were off the list in at least one subsequent quarter, and then came back on the list
- Continuous:** CWS that have remained on the list of CWS with health-based violations since baseline (2017Q3) and continue into the current quarter

National Initiatives - Next Cycle Update

- The Agency is in the last year of the current cycle (FY 2020 – FY 2023) for its National Compliance Initiatives, or NCIs; we have begun thinking about which sectors or programs should be part of the next cycle (FY 2024 – FY 2027).
- Consulting with our regional offices, we've been evaluating the progress and challenges of the current initiatives and assessing whether they should continue in the next cycle or not or continued with a modified focus.
- At the same time, we're considering potential new initiatives, taking into account environmental challenges we are seeing across the country, and looking to see where EPA enforcement can make a difference.
- It is important to note the Environmental Justice and climate considerations have been incorporated into the current NCIs and will continue to be included in every NCI going forward in the next cycle.
- We plan to publish the FR notice in early January. It will provide for a 60-day comment period. We are giving you a heads up now so that you can be ready to review it. We are encouraging all stakeholders to submit comments during the 60-day window.

Next Cycle - Timeline

- Early January 2023: FR notice
- Early March 2023: FR comment period closes
- Early Summer 2023: Final Initiatives selected
- October 2023: New FY 2024-2027 Initiatives begin

Discussion / Questions

EPA Environmental Justice Disparity Indicators: Measuring Change on the Ground

EPA National
EJECR
Community
Engagement
Call:
December 13,
2022

What is a health disparity?

An actionable difference: “a particular type of health difference that is closely linked with social, economic, and/or environmental disadvantage. Health disparities adversely affect groups of people who have systematically experienced greater obstacles to health based on their **racial or ethnic group**; religion; **socioeconomic status**; gender; age; mental health; cognitive, sensory, or physical disability; sexual orientation or gender identity; **geographic location**; or other characteristics historically linked to discrimination or exclusion.”

Agency Priority Goal (APG)

By September 30, 2023, EPA will develop and implement a cumulative impacts framework, issue guidance on external civil rights compliance, establish at least 10 indicators to assess EPA's performance in reducing disparities in environmental and public health conditions, and train staff and partners on how to use these resources.

Overall Strategic Vision

Through clear and meaningful metrics, EPA will be able to evaluate its success in eliminating public health and environmental disparities.

Think holistically

- Collaborate across EPA programs
- Engage external agency partners
- Multi-media indicators to address environment and health

Clear connection to EPA's priorities & programs

- Outcomes we can affect through statutes, partnerships, and resources
- Outcomes we can affect through whole of government approach

Be bold

- Use our resources to do things differently
- Think outside of the box—build on what many states are doing, but go further
- Shift from siloed approach to unified, interconnected effort
- Consider cumulative impacts, addressing disparities across multiple stressors

Data integrity, sources, and visualization

- Use accurate and reliable data that has undergone QA/QC and is publicly available
- Allows us to visualize, track and communicate progress effectively to ensure trends are moving in right direction

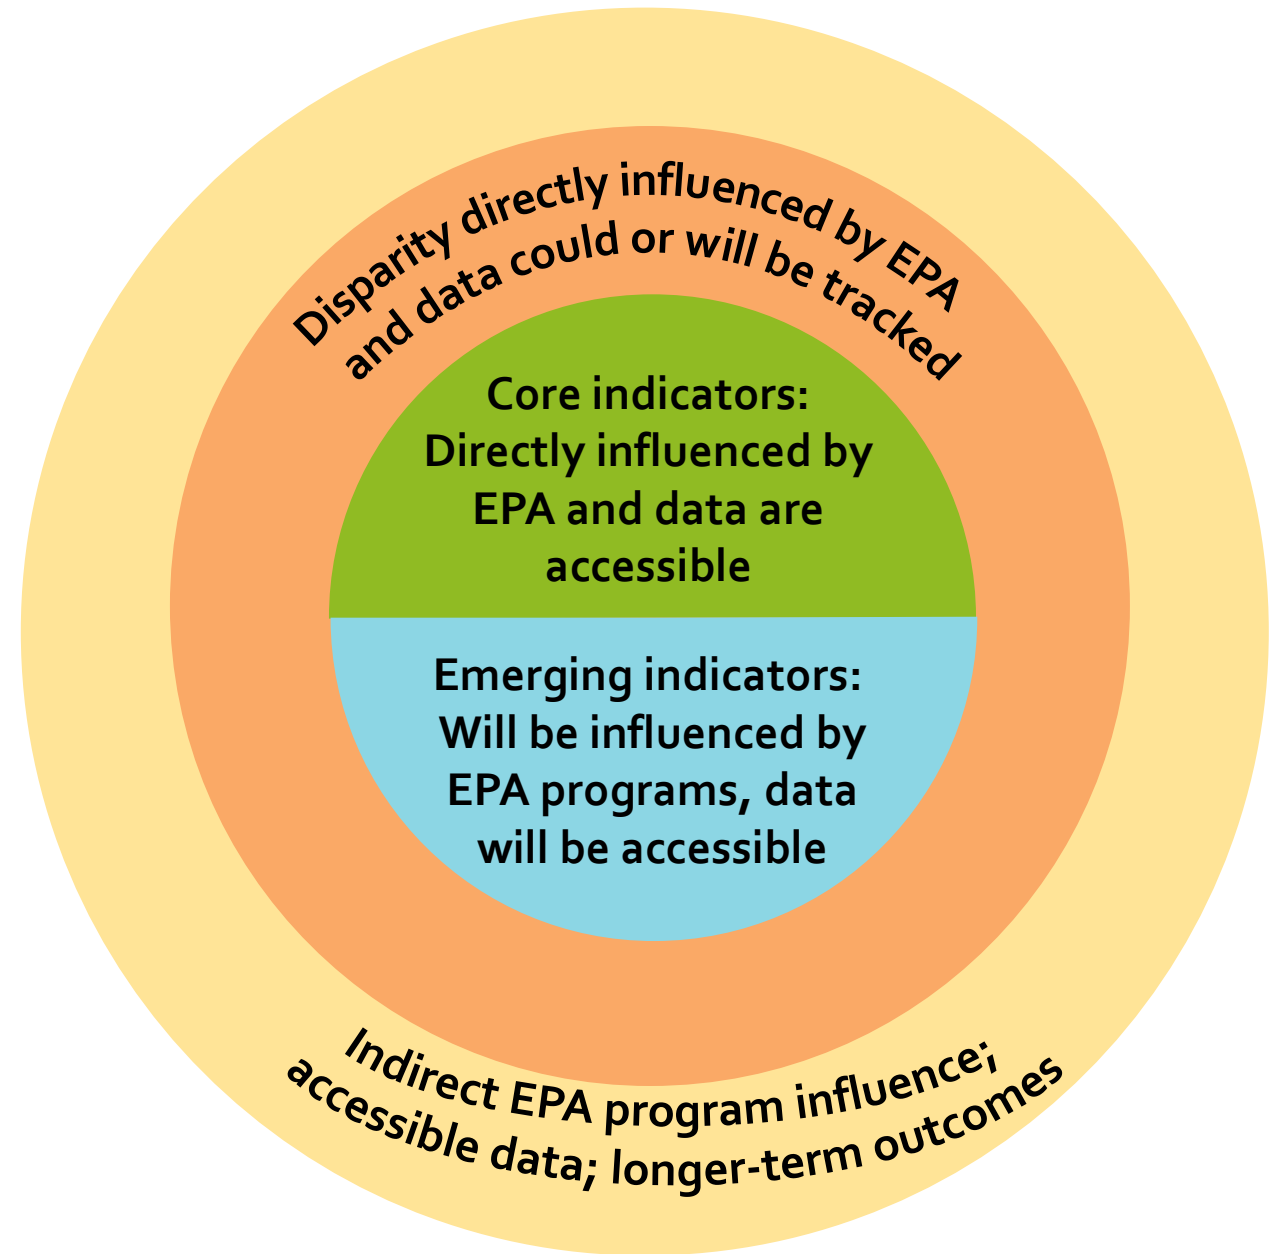

Meaningful impacts

- Connect to long-term health outcomes
- See real disparity reductions in vulnerable communities—the only way to achieve health equity
- Ensure that communities are moving from surviving to thriving

Characterizing Draft Indicators

Two important criteria:

- 1) Direct connection of disparity to EPA's authorities and program
- 2) Data accessibility and reliability

Draft Indicators:
Directly influenced by EPA, state, and local programs; data source is accessible

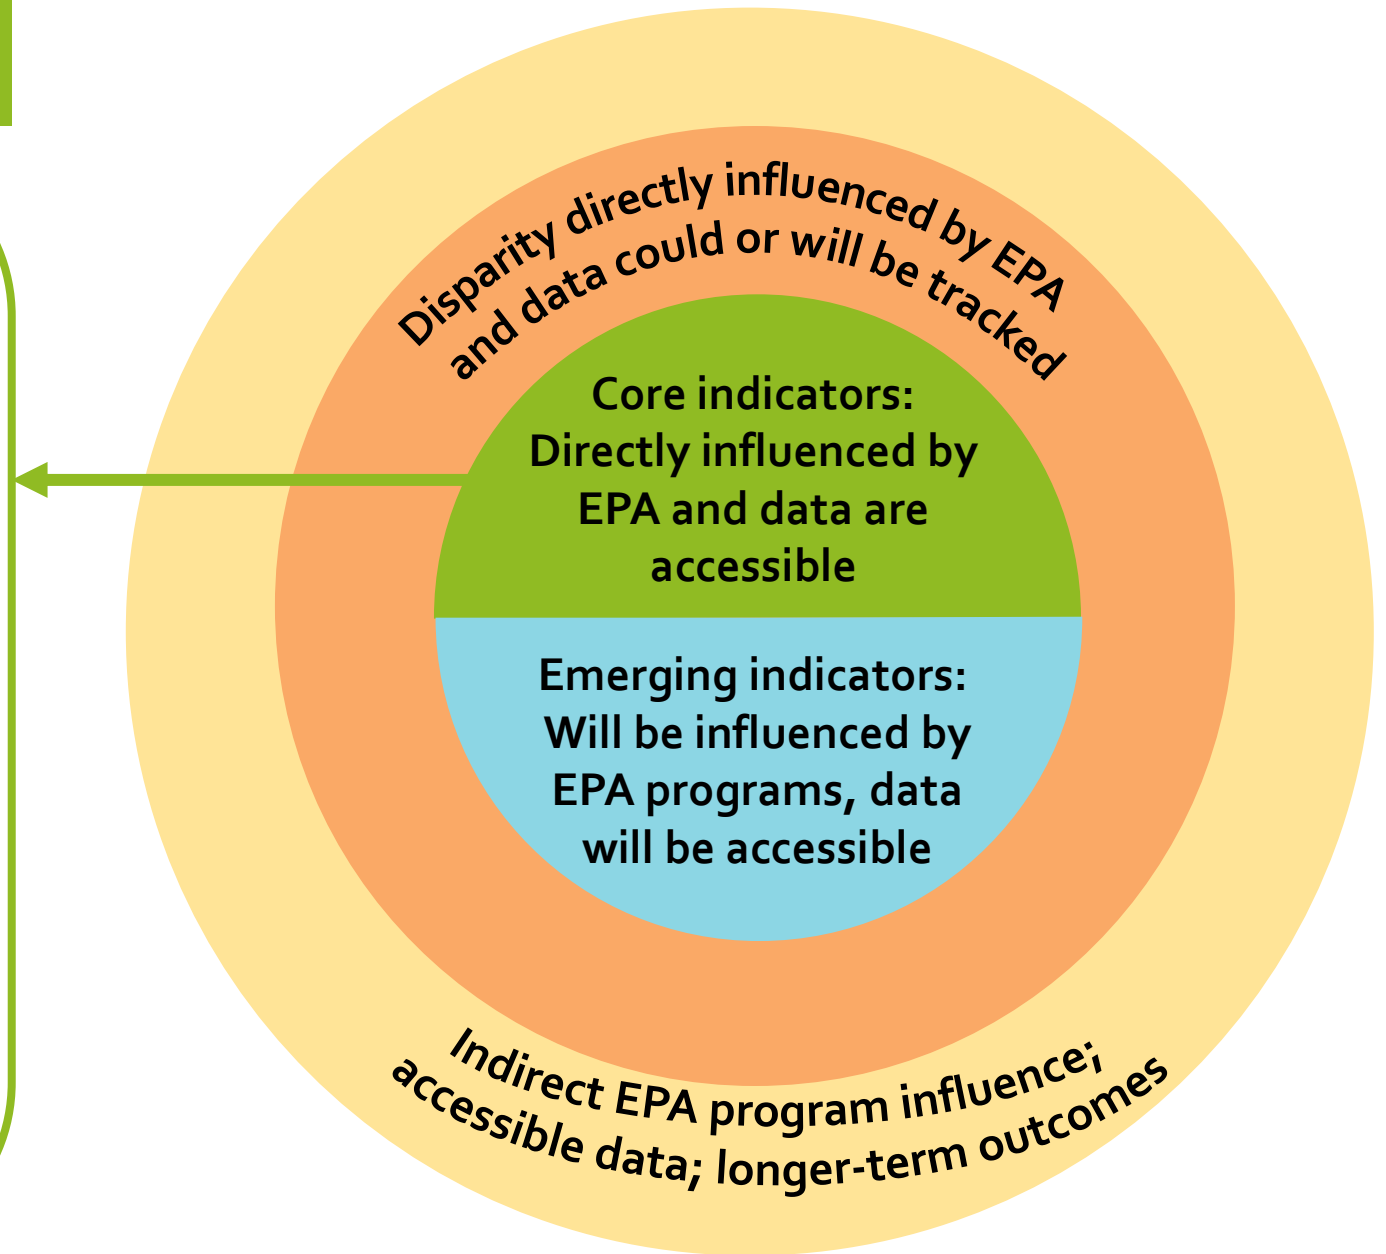

Population living within 1 mile of a Superfund site by race/ethnicity & socioeconomic status (SES)

Percentage of children 0-17 reported to have asthma by race/ethnicity & socioeconomic status (SES)

Percentage of population of low socioeconomic status (SES) in areas meeting the PM_{2.5} National Ambient Air Quality Standards (NAAQS)

Blood lead level in children 1-5 by race/ethnicity & socioeconomic status (SES)

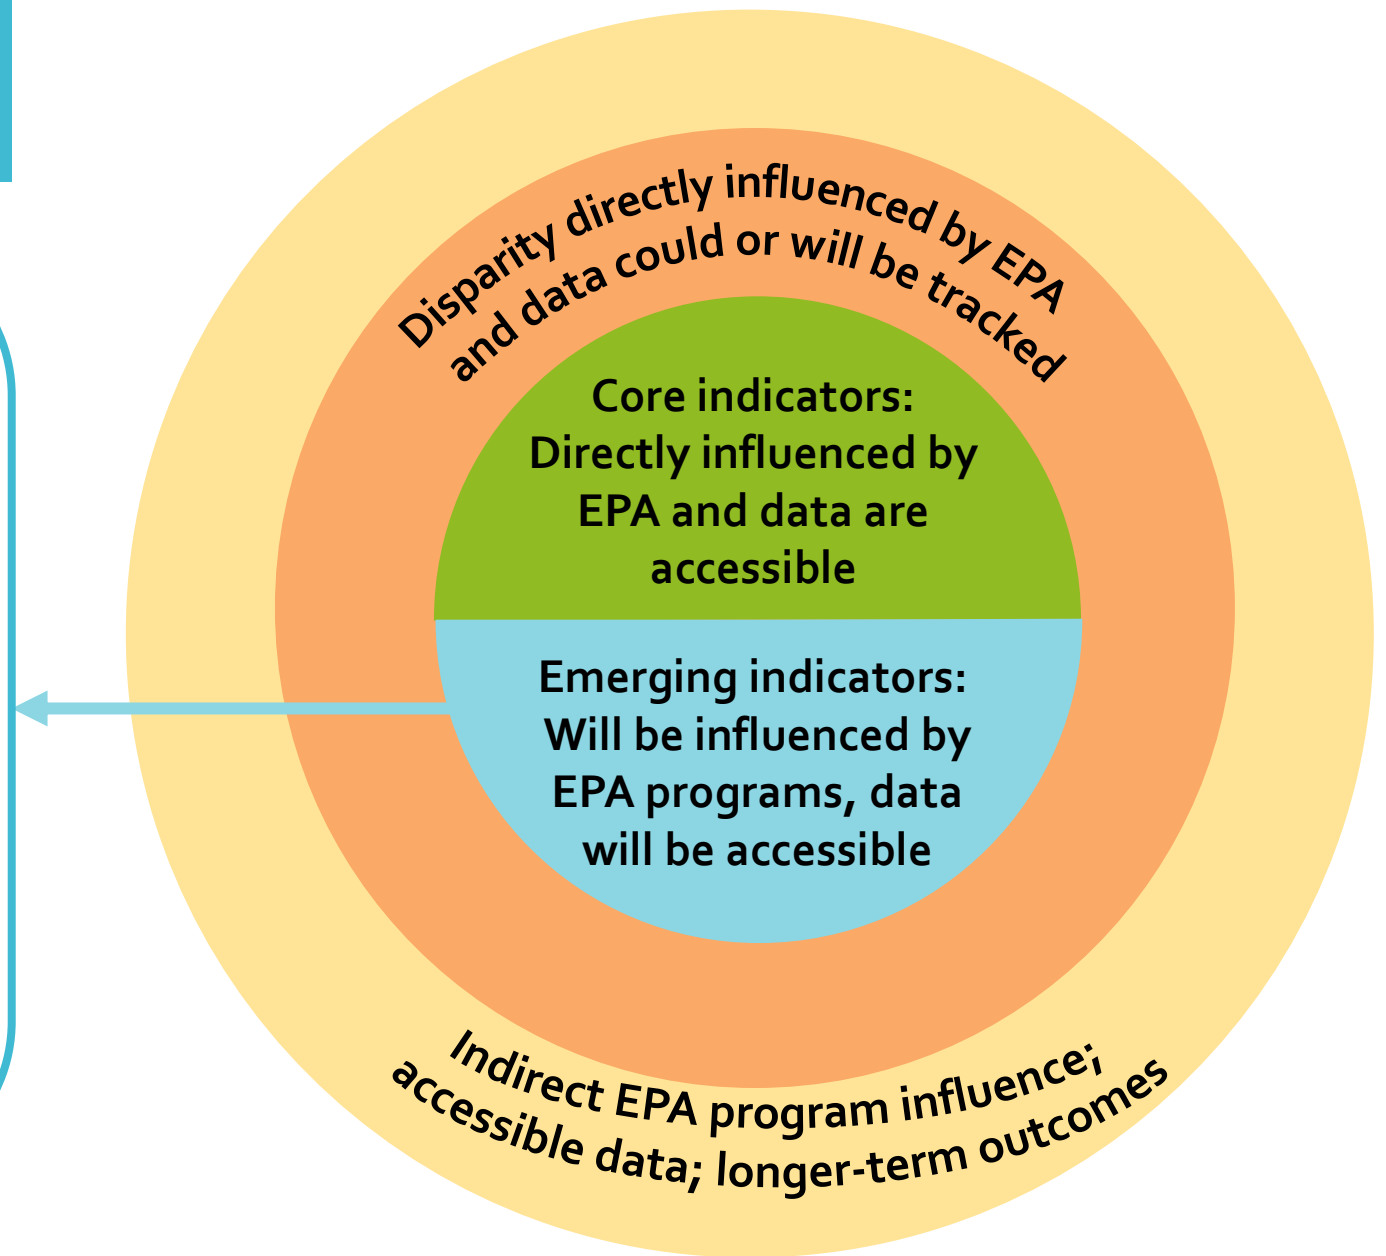

Number of community water systems (CWSs) in Indian Country in non-compliance with health-based standards (compared to CWSs elsewhere)

Draft Indicators:
EPA programs almost ready;
accessible data

Increase tree canopy in low socioeconomic status (SES) communities and communities of color

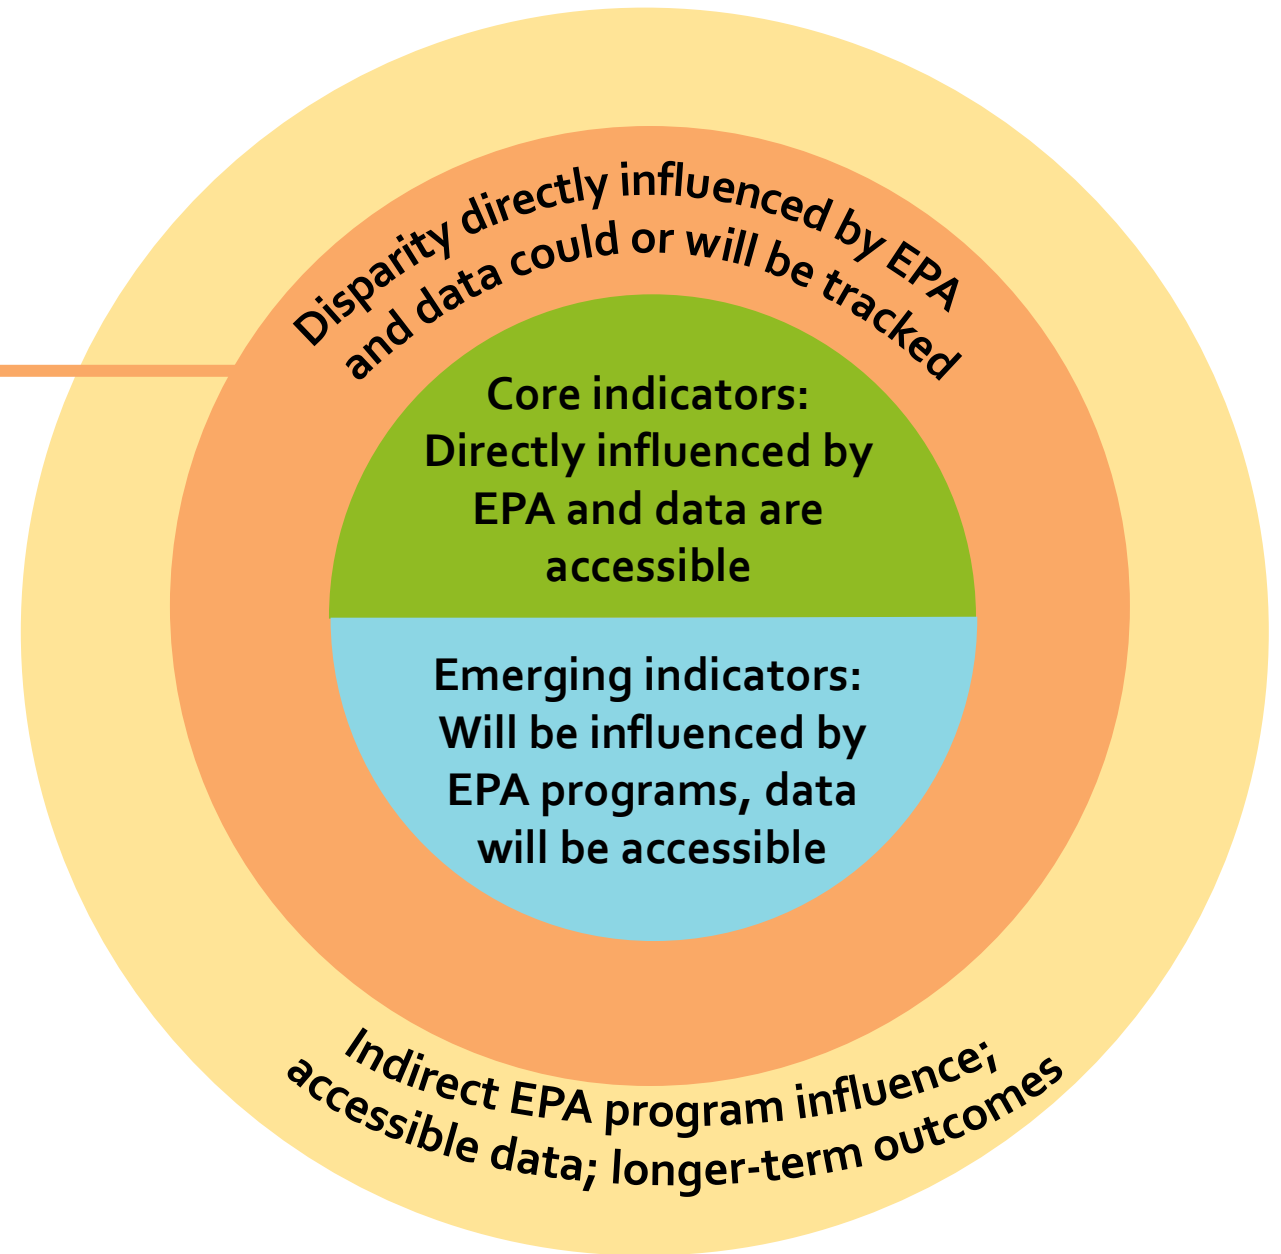

Increase green space in low socioeconomic status (SES) communities and communities of color

Draft Indicators: Direct influence; data could be or will be tracked

Lead service line
replacement (data will be
tracked for Bipartisan
Infrastructure Law funded
projects)

Children with elevated blood
lead levels in high-risk
communities (data is available in
some areas and varies by state)

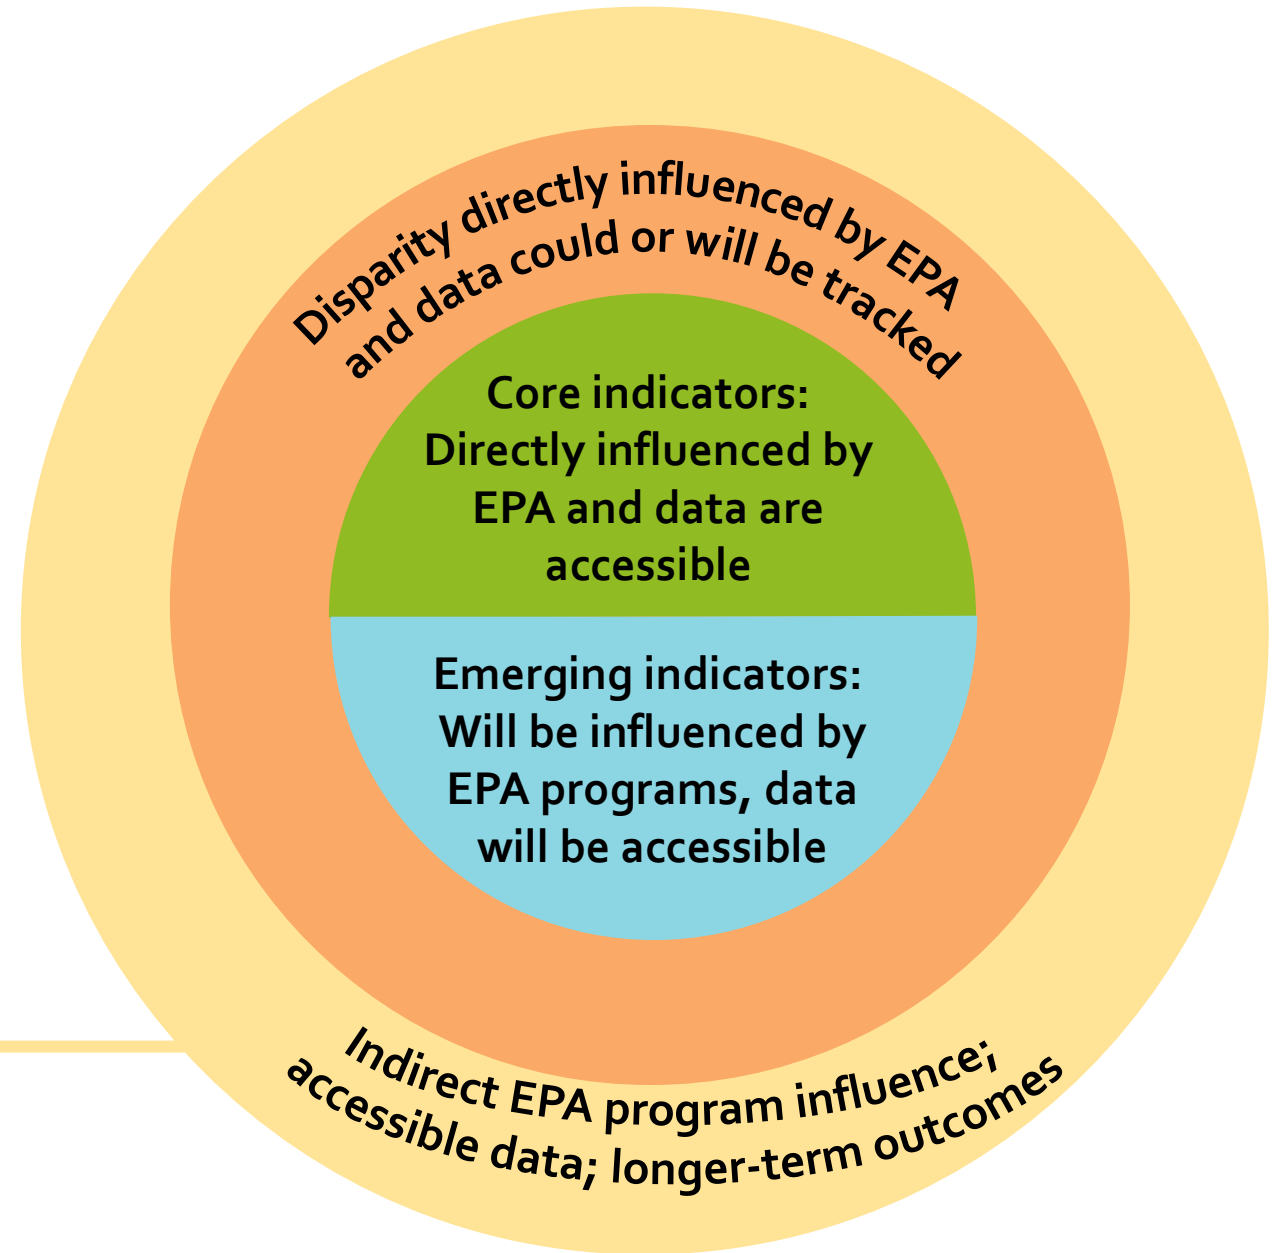

Draft Indicators:
Indirect influence; accessible
data; long-term outcomes

Age-adjusted cardio-vascular
disease (CVD)/ hypertension
prevalence by race/ethnicity &
socioeconomic status (SES)

Percentage of babies born pre-
term or underweight by
race/ethnicity & socioeconomic
status (SES)

Life expectancy by race
/ethnicity & socioeconomic
status (SES)

Other Draft Indicators: Varied influence of EPA programs; data challenges

**Improving farmworker health
(some data sources available in
some places – could pilot in
specific areas)**

**CDC Heat & Health Tracker
(heat data is national but heat-
related illness data is limited)**

Other Draft Indicators: Outputs of EPA Programs

**Increase percentage of lead
paint inspections in
communities with EJ concerns**

**Increase education and
engagement for families and
childcare providers to prevent
lead exposure in areas of
highest risk**

Next Steps

1

Gather
feedback from
public and
partners

2

EPA leadership
briefings and
feedback

3

Refine
indicators
(directionality
and comparison
groups)

4

EPA finalizes
initial list of
indicators

5

Develop
processes and
tools for data
collection

Discussion Questions

- What are the most important environmental health disparity indicators that communities would like EPA to explore in the future?
- What kind of representation/ visualization/ information will be most meaningful for showing EPA's progress?
